

# VISHAL KANNA B

## Data Analyst

vishalkanns@gmail.com | +91 9025028811 | Namakkal, Tamil Nadu, 637406, India

### PROFILE

Results-driven Data Analyst skilled in Python, SQL, Power BI, Tableau, and Flask for analytics, automation, and visualization. Experienced in building end-to-end data solutions that integrate databases, APIs, and dashboards to deliver actionable insights. Currently exploring Generative AI (GenAI) and Agentic AI to enhance data storytelling, automation, and intelligent decision systems. Strong in data wrangling, EDA, ETL, and machine learning fundamentals, with a focus on using AI-driven automation to accelerate business insights.

### PROFESSIONAL EXPERIENCE

**GUVI, Data Science & Python Projects (Course Work)** 04/2023 – 02/2024 | IIT Madras, India (Remote)  
• Developed full-stack applications using Python, Flask, and REST APIs Completed multiple end-to-end projects including Fake News Detection, Flat Price Prediction, and YouTube Data Pipeline Performed data cleaning, analysis, modeling, and visualization with Pandas, NumPy, Matplotlib, and Seaborn

### EDUCATION

**Bachelor of Computer Applications (BCA),** 05/2024 | Namakkal, India  
*Muthayammal Memorial College of Arts and Science*  
• Participated in hackathons and symposiums, winning awards for innovative data-driven projects.

**Advanced Programming & Master Data Science Certification,** 04/2023 – 02/2024 | IIT Madras  
*GUVI Geek Networks*  
• Trained in Python, SQL, Flask, Django, REST APIs, and MySQL. Hands-on experience in Machine Learning, EDA, and Visualization using Pandas, NumPy, Matplotlib, and Seaborn.

### CORE COMPETENCIES

**Programming & Scripting:** Python (Pandas, NumPy, Scikit-learn), Flask, Streamlit, Basic JavaScript

**Databases:** MySQL, SQL, NoSQL (MongoDB)

**Data Science & AI:** Exploratory Data Analysis (EDA), ML (Supervised & Unsupervised), Regression, Classification, Data | Visualization) Tableau, Power BI, Generative AI (GenAI), Agentic AI, Prompt Engineering, LLM Integration

**Software Development:** RESTful APIs, Flask Web Applications, Full-Stack Development, Frontend-Backend Integration

**Cloud & Deployment:** Streamlit Apps Deployment, Render, AWS (EC2, S3)

### PROJECTS

**Flat Price Prediction Tool, IIT Madras** 03/2024 – 05/2024  
• Built and deployed a regression-based model using Python (Pandas) to predict flat prices with ~90% accuracy.  
• Performed data cleaning, feature engineering, and EDA for large real estate datasets.  
• Designed dashboards using Streamlit and Google Sheets, improving insight delivery speed by 80%.

**Fake News Detection System, GUVI – IIT Madras** 02/2024 – 04/2024  
• Developed a text classification model using TF-IDF and Multinomial Naive Bayes to detect fake news.  
• Built a Flask-based web interface (HTML, CSS, Bootstrap) for real-time prediction and result visualization.  
• Implemented user authentication and data preprocessing pipelines, achieving 90% accuracy.  
• Gained hands-on experience in full-stack ML deployment and NLP-driven web applications.

**YouTube Data Harvesting & Warehousing, GUVI – IIT Madras** 12/2023 – 01/2024  
• Created a data pipeline using Python and YouTube Data API v3 to collect video metadata Implemented MongoDB + PostgreSQL storage for structured/unstructured data, optimizing performance by 0%.  
• Developed an interactive Streamlit dashboard for real-time visualization of engagement metrics.

### CERTIFICATIONS

- |                                                                                          |                                                                                           |                                                                                          |                      |
|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|----------------------|
| • Python Programming & Full-Stack Development, GUVI Geek Networks, IIT Madras Artificial | • Intelligence Foundation: Neural Networks, National Registry of CPE – QAS Data Science & | • Data Analytics (Project-Based), GUVI Geek Networks, IIT Madras Power BI for Beginners, | • GUVI Geek Networks |

### AWARDS

**Hackathon Winner – Mentor Students Smart Campus,** 01/02/2023  
*BHUMI in collaboration with Cisco Foundation*  
Won first place at the Skilled Hackathon 2023-202 for presenting an innovative project titled “Mentor Students Smart Campus”, demonstrating practical application of Python, data management, and full-stack development skills
